

Proposal for Clarion Tax Law Group: The "Legacy Defined" Campaign

Executive Summary

Apex Creative Partners is pleased to submit this proposal to partner with Clarion Tax Law Group for the upcoming 2027 tax season. We recognize the unique challenges of the highly seasonal tax industry and the critical need to guide consumers through periods of confusion with authoritative messaging. Our approach leverages data-driven insights to reach the "Sensible Optimist" audience, specifically targeting the 35-44 demographic and mobile-first users to drive a 2.2% relative lift in brand consideration.

Agency Profile

With over 15 years of experience in seasonal retail and financial services, our agency specializes in rapid-scale campaigns. We have a proven track record of managing high-volume budgets in short windows, mirroring the concentrated spend required between January and April. Our expertise in multicultural (USM) segments has historically delivered CPAs significantly lower than general market averages.

Strategic Approach: Data-Driven Empathy

Our strategy positions Clarion Tax Law Group as the steady hand in a fluctuating tax landscape.

- Audience Segmentation: We will utilize Brand and Generic Custom Intent audiences to capture users the moment they begin searching for tax preparation products.

- Behavioral Targeting: High-priority focus on the 35-44 age group, which has shown a 7.9% historical relative lift.
- Contextual Relevance: Aligning messaging with current tax law changes to address consumer confusion directly.

Media Plan: Digital-First & Mobile-Optimized

Given that 91% of the target reach in this sector is achieved on mobile and tablet devices, our media plan is built for small screens.

Channel Mix & Tactics

To complement our digital-first strategy, we will incorporate Connected TV (CTV) to bolster brand authority. By leveraging high-impact, long-form storytelling, we will establish trust during the critical consideration phase, effectively bridging the gap between awareness and conversion.

Channel	Tactic	Objective
YouTube ▾	TrueView for Action	Drive conversions and consultations.
YouTube ▾	6s Bumper Ads	High-frequency reach and brand recall.
Search ▾	Generic Tax Intent	Capture active searchers during peak windows.
Connected TV (CTV)	Premium Inventory Placement	Brand awareness and high-impact storytelling.

- **Bidding Strategy:** We will implement "Target CPA" (tCPA) bidding to maximize conversion volume while maintaining efficiency.

- **Creative Assets:** Video content will be optimized for a 98% sound-on benchmark to ensure high impact on mobile.
- **Conversion Optimization:** Every ad will feature "Sitelinks for Action," including "Make an Appointment" to lower overall CPAs.

Measurement & Optimization Plan

We are committed to meeting and exceeding historical performance benchmarks.

- **KPI Tracking:** We will target a Cost Per Lifted User (CPLU) of \$0.81 and a unique reach of over 11 million users.
- **Brand Lift Studies:** Continuous monitoring of awareness and consideration lift via Google Brand Lift surveys.
- **Performance Optimization:** Underperforming assets will be paused within 48 hours of detection.

Proposed Budget Allocation

Category	Allocation	Note
Digital Video (YouTube)	60%	Primary driver for reach and consideration.
Performance Search	25%	Capturing high-intent "Tax Attorney" queries.
Multicultural (USM)	15%	Targeting efficient retail CPA segments.

Campaign Timeline

We are prepared to meet the accelerated timeline required for a mid-December launch.

- **Strategy Finalization:** 📅 Date
- **Creative Production:** July – October 2026
- **Campaign Launch:** December 15, 2026
