

RFP Response: Integrated Launch Campaign

Executive Summary

Nexus Creative is pleased to submit this proposal to partner with Starlight Entertainment for the upcoming seasonal launch. Our agency specializes in high-impact, data-driven storytelling that bridges the gap between digital awareness and theatrical/streaming conversion. We understand that the entertainment landscape is highly seasonal and requires a multi-funnel approach to capture attention in a crowded market. Our strategy leverages advanced AI-driven audience modeling and persona-based personalization to ensure your content resonates with the "Sensible Optimist" and "Mobile-First" demographics.

Strategic Approach & Methodology

To meet your ambitious reach and consideration goals, we propose a three-tiered strategic framework:

- **RFP Analysis & Goal Alignment:** We begin by analyzing internal historical data and previous campaign performance to identify high-conversion segments.
- **Multi-Funnel Engagement:** Utilizing a mix of YouTube (TrueView for Action, Bumper ads) and social platforms to drive both broad awareness and direct action (e.g., "Book Tickets" or "Start Trial").
- **Persona-Based Personalization:** Developing bespoke creative assets tailored to specific demographics, such as personalizing backgrounds and messaging based on geographic or interest-based data.

Media & Creative Plan

Our media plan is designed to achieve a unique reach of 11M+ users while maintaining a highly efficient Cost Per Lifted User (CPLU).

Channel	Format	Primary Objective
YouTube	6s & 15s High-Impact Video	Brand Recall & Awareness
Social (IG/TikTok)	Vertical Video & Lifestyle Imagery	Engagement & Viral Reach
Search	Custom Intent Keywords	Capturing Active Intent
Programmatic	Display & Persona-Targeted Ads	Conversion & Frequency

We will employ **Target CPA (tCPA) bidding strategies** to optimize conversion volume and ensure your budget is deployed during peak seasonal windows for maximum ROI.

Creative Innovation: GenMedia POCs

Nexus Creative is at the forefront of visual generation. We propose incorporating "GenMedia" Proof of Concepts (POCs) for this campaign, including:

- **Automated Content Adaptation:** Rapidly adapting master creative into multiple formats and aspect ratios using AI-driven workflows.
- **Dynamic Video Iterations:** Monthly production of "sizzle" versions and case studies to keep the content fresh and relevant throughout the season.
- **AI-Enhanced Audibility:** Ensuring 98% sound-on benchmarks for all mobile-first video content to drive higher engagement.

Measurement & KPIs

Success will be measured against the following historical benchmarks:

- **Brand Consideration Lift:** Targeting a relative lift of >2.2%.
- **Search Lift:** Aiming for a 69% increase in brand-specific keyword searches.
- **Efficiency:** Achieving a Retail CPA at least 24% lower for specialized multicultural segments.

Project Budget & Allocation

Budget Category	Allocation (%)	Focus Area
Digital Media Spend	60%	Primary ad placement across YouTube, Social, and Search
Creative Production & Assets	25%	GenMedia POCs and content adaptation
Agency Management & Analytics	15%	Strategic planning, reporting, and campaign optimization

Proposed Timeline

- **Date** : Final Strategy Approval
- **Date** : Creative Development & POC Testing
- **Date** : Pre-Launch Teaser Phase
- **Date** : Campaign Launch (Peak Window)
